

Array problem 8:

Move all negative numbers to the beginning and positive ones to the end with constant extra space:

```
#include<stdio.h>

int main()
{
    int i,j,n,arr[100];
    int temp=0;
    printf("Enter the size of array:");
    scanf("%d",&n);
    printf("Enter the elements of array:");
    for(i=0;i<n;i++)
    {
        scanf("%d",&arr[i]);
    }
    j=0;
    for (int i = 0; i < n; i++) {
        if (arr[i] < 0) {
            if (i != j) {
                int temp = arr[i];
                arr[i] = arr[j];
                arr[j] = temp;
            }
        }
    }
}
```

```
    }  
    j++;  
}  
}
```

```
for (int i = 0; i < n; i++) {  
    printf("%d ", arr[i]);  
}  
printf("\n");  
return 0;  
}
```
